Keywords: Conservation, Manipur, new record, Orchidaceae, orchid checklist, threats.

Summary. Manipur is one of the eight states of North-East India placed inside square area 23°83'–25°68'N and 93°03'–94°78'E. The natural vegetation of the state falls under the Indo-Myanmar Biodiversity Hotspot area with rich flora and fauna. In the present paper, 389 taxa of orchids (including 7 new records to Manipur) belonging to 90 genera, are listed and analysed. Various threats for the depletion of orchid species in the natural habitats of Manipur have been discussed and necessary conservation measures for their conservation are suggested.

Дополненный список флоры орхидных Манипура

² Центральный национальный гербарий, Индийский ботанический сад,
Шибпур, Ховрах-711103, Западная Бенгалия, Индия

Ключевые слова: лимитирующие факторы, Манипур, новая находка, сохранение, список орхидных, Orchidaceae.

Аннотация. Манипур – один из восьми штатов Северо-Восточной Индии, расположенный на площади между 23°83'–25°68' с.ш. и 93°03'–94°78' в.д. Естественная растительность штата попадает в область “Indo-Myanmar Biodiversity Hotspot” с богатой флорой и фауной. В настоящей статье перечислены и проанализированы 389 таксонов орхидных (включая 7 новых находок для Манипура) из 90 родов. Обсуждаются различные лимитирующие факторы, приводящие к сокращению видов орхидных в естественных местообитаниях Манипура, и предлагаются необходимые меры по сохранению орхидных.

Introduction

Manipur is one of the eight states of North-East India placed at the eastern end of the region between the latitude of 23°83'–25°68'N and longitude of 93°03'–94°78'E and bordered by Nagaland on the north, Assam on the west and Myanmar on South and east (Fig. 1). The state is spreaded over an area of about 22347 sq. km of which about 14365

sq. km (nearly 64 % of the total geographical area of the state) is covered by natural vegetation which may be classified into four types: “Tropical Semi-evergreen”, “Dry Temperate”, “Sub-Tropical Pine” and “Tropical Moist Deciduous”. There are forests of teak, pine, oak, bamboo and cane. The natural vegetation of Manipur falls under the **Indo-Myanmar Biodiversity Hotspot area** (Singh et al., 2010) with rich flora and fauna.

Materials and methods

A critical review of literature (Hooker, 1888–1890; Pradhan, 1976, 1979; Shukla, Baishya, 1979; Ramakandtha, 1995; Phukan, 1996; Mao, 1999; Chauhan, 2001; Meitei et al., 2014; Laiphrajkpam et al., 2014, 2015; Rao, Kumar, 2015; Sharma et al., 2015; Khuraijam, Roy, 2016) reveals that the state Manipur has been explored by several plant collectors and botanists since British period. Some

of the important persons who made botanical collections from the state are George Watt in 1881–1882, C. B. Clarke in 1889, A. K. Meebold in 1906–1907, N. L. Bor in 1938–1945, K. Ward in 1952 (Kumar, Kumar, 2005) and subsequently during post independence period S. K. Mukerjee (1953), D. B. Deb (1956, 1957, 1961), Devi and Ghatak (1984), Ghatak and Devi (1986) and several botany scientists from Botanical Survey of India and other Research Institutions, Universities and

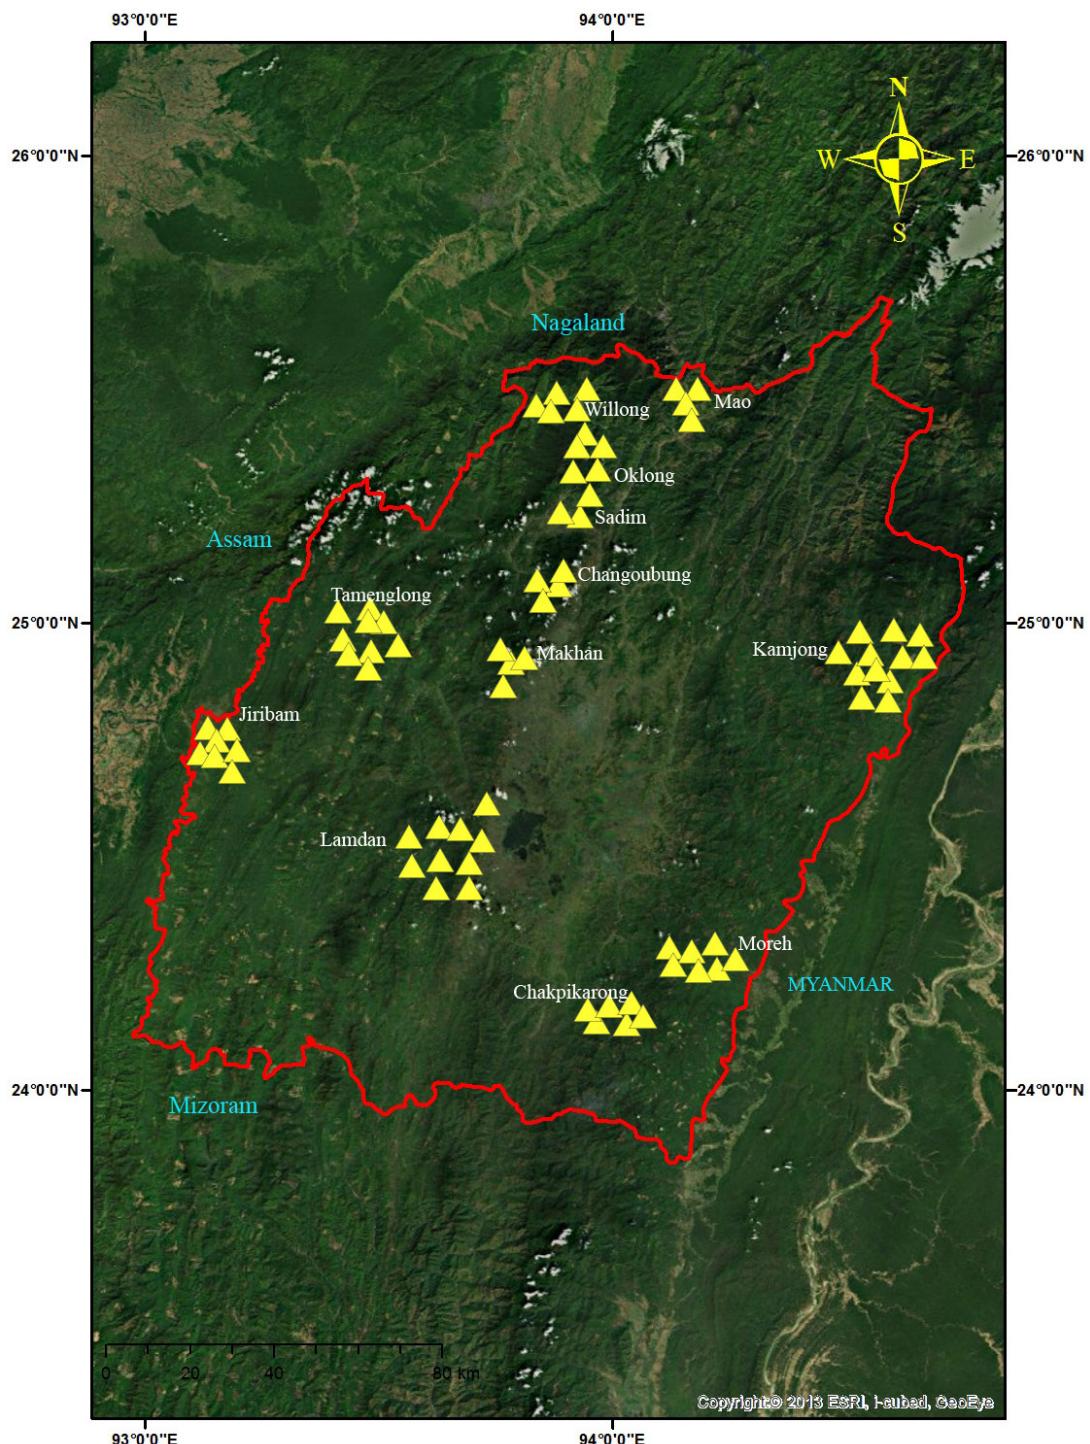

Fig. 1. Map of Manipur state showing the orchid survey areas in yellow triangle (Arc Map 10.5).

plant collectors from various orchid nurseries of N. E. Indian states.

During the last five years i. e. since 2012, a critical study has been conducted by the authors, based on the living collections which are made from different parts of Manipur and brought under cultivation at Orchid Research and Development Centre (ORDC), Hengbung, Manipur; herbarium collections deposited at Central National Herbarium (CAL), Howrah, West Bengal; BSI, Shillong (ASSAM), Meghalaya and COGCEHR Herbarium, Hengbung, Manipur; and consultation of many research papers

(Phukan, Mao, 2002a-b, 2004; Kumar, Kumar, 2005; Rao, 2007, 2015; Cholco, 2009; Chowdhery, 2009; Nanda et al., 2012a-b, 2013a-c, 2014a-d; Chowlu et al., 2012a-b, 2013a-e, 2014a-c, 2015a-c; Kishor et al., 2012, 2014; Yumkham et al., 2013; Chowlu, 2014, 2016; Chowlu, Rao, 2015a-b; Kumar, Rao, 2015; Kumar et al., 2015, 2016a-b, 2017; Rao et al., 2016; Kumar, 2017) on orchids of Manipur. The list of orchids reported so far from Manipur are listed in Table, nomenclature of each species is followed as per the World Checklist of Orchidaceae (Govaerts et al., 2018) and the analysis has been discussed below.

Table
List of Orchid species reported from Manipur

S. No.	Species/ variety	Habit	Voucher specimens record	Reference of first report for the state
1.	<i>Acampe carinata</i> (Griff.) Panigrahi	E	Nanda et al. 00294, 00482, 00051(all at COGCEHR)	Devi, Ghatak, 1984
2.	<i>Acampe ochracea</i> (Lindl.) Hochr.	E	Nanda 00174 (COGCEHR)	Chauhan, 2001
3.	<i>Acampe praemorsa</i> (Roxb.) Blatter et McCann var. <i>rigida</i> (Smith) Barbhuiya et al.	E	Herbarium not available. Live plants under cultivation.	Devi, Ghatak, 1984
4.	<i>Acanthophippium sylhetense</i> Lindl.	T	Herbarium not available.	Chauhan, 2001
5.	<i>Aerides multiflora</i> Roxb.	E	Nanda et al. 40 (COGCEHR)	Devi, Ghatak, 1984
6.	<i>Aerides odorata</i> Lour.	E	Nanda et al. 00323 (COGCEHR)	Devi, Ghatak, 1984
7.	<i>Aerides rosea</i> Lindl. et Paxt.	E	Nanda et al. 00004 (COGCEHR)	Nanda et al., 2013c
8.	<i>Agrostophyllum callosum</i> Rchb. f.	E	Kishor et al. 00258, 00460 (all at COGCEHR). D. B. Deb 1528; A. Meebold 6904 (all at CAL)	Mukerjee, 1953
9.	<i>Agrostophyllum planicaulum</i> J. Sm.	E	Herbarium not available.	Clarke, 1889
10.	<i>Ania angustifolia</i> Lindl.	T	Nanda 00011; V. Kumar 1658 (all at COGCEHR)	Nanda et al., 2013c
11.	<i>Aniaviridifusca</i> (Hook.) Tang et Summerh	T	George Watt 6293 (K)	Kumar, Kumar, 2005
12.	<i>Anoectochilus roxburghii</i> (Wall.) Lindl.	T	Herbarium not available.	Clarke, 1889
13.	<i>Anthogonium gracile</i> Lindl.	T	V. Kumar 1656; Nanda 00054 (all at COGCEHR)	Mukerjee, 1953
14.	<i>Aphyllorchis montana</i> Rchb. f.	M	V. Kumar 1660, 1161 (COGCEHR)	Rao, Kumar, 2015
15.	<i>Arachnis clarkei</i> (Rchb. f.) J. J. Sm.	E	Kishor et al. 00045 (COGCEHR)	Rao, 2007
16.	<i>Arachnis labrosa</i> (Lindl. et Paxt.) Rchb. f.	E	C. Sathish Kumar 28747 (TBGT).	Kumar, Kumar, 2005
17.	<i>Arachnis senapatiianum</i> (S. Phukan et A. A. Mao) Kocyan et Schuit.	E	A. A. Mao 60271 (CAL)	Phukan, Mao, 2002b
18.	<i>Arundina graminifolia</i> (D. Don) Hochr.	T	Nanda et al. 00157 (COGCEHR). D. B. Deb 306, 806, 1234, 2668; S. K. Mukerjee 3121(all at CAL)	Mukerjee, 1953

Results and discussion

Orchid Genera so far reported from Manipur are arranged in the phylogenetic classification (Chase et al., 2015). According to this classification, the 90 genera represent 4 Subfamilies, 13 Tribes and 14 Subtribes as shown below. The number of species known from Manipur and the total number of species in the genus are indicated in parentheses.

Systematic overview

Subfamily: Vanilloideae Szlach.

Tribe: Vanilleae Blume

Genera: *Cyrtosia* Blume (1/5), *Galeola* Lour. (2/6), *Vanilla* Mill. (1/105).

Subfamily: Cypripedioideae Kostel.

Genus: *Paphiopedilum* Pfitzer (5/86)

Subfamily: Orchidoideae A. A. Eaton

Tribe: Cranichideae Pfeiff.

Subtribe: Goodyerinae Klotzsch

Genera: *Anoectochilus* Blume (1/43), *Erythrodes* Blume (2/26), *Goodyera* R. Br. (4/98), *Myrmecis* Blume (1/17), *Odontochilus* Blume (2/25), *Zeuxine* Lindl. (3/74).

Subtribe: Spiranthinae Lindl. ex Meisn.

Genus: *Spiranthes* Rich. (2/34)

Tribe: Orchideae Verm.

Subtribe: Orchidinae Verm.

Genera: *Habenaria* Willd. (8/835), *Herminium* L. (1/19), *Pecteilis* Raf. (2/8), *Peristylus* Blume (8/103), *Ponerorchis* Rchb.f. (1/55), *Satyrium* Sw. (1/86),

Subfamily: Epidendroideae Kostel.

Tribe: Neottieae Lindl.

Genera: *Aphyllorchis* Blume (1/22), *Cephalanthera* Rich. (1/19)

Tribe: Tropidieae Dressler

Genera: *Corymborkis* Thouars (1/6), *Tropidia* Lindl. (2/31)

Tribe: Nervilieae Dressler

Subtribe: Nerviliinae Schltr.

Genus: *Nervilia* Gaudich. (4/67).

Tribe: Arethusea Lindl.

Subtribe: Arethusinae Benth.

Genera: *Anthogonium* Lindl. (1/1), *Arundina* Blume (1/2)

Subtribe: Coelogyninae Benth.

Genera: *Coelogyne* Lindl. (21+1var./200), *Dickasonia* L. O. Williams (1/1), *Neogyna* Rchb. f. (1/1), *Otochilus* Lindl. (3/5), *Panisea* (Lindl.) Lindl. (4/11), *Pholidota* Hook. (7/39), *Pleione* D. Don (4/21), *Thunia* Rchb. f. (1/5).

Tribe: Malaxideae Lindl.

Subtribe: Dendrobiinae Endl.

Genera: *Bulbophyllum* Thouars (39/1867), *Dendrobium* Sw. (66+1var./1509).

Subtribe: Malaxidinae Benth. et Hook. f.

Genera: *Crepidium* Tausch (5/260), *Dienia* Lindl. (1/6), *Liparis* Rich. (11/426), *Oberonia* Lindl. (14+1var./323)

Tribe: Cymbidieae Pfitzer

Subtribe: Cymbidiinae Benth.

Genera: *Cymbidium* Sw. (22/71)

Subtribe: Eulophiinae Benth.

Genera: *Eulophia* R. Br. (5/200), *Geodorum* Andrews (2/12)

Tribe: Epidendreae Lindl.

Subtribe: Calypsoinae Chase et al.

Genus: *Yoania* Maxim. (1/4).

Subtribe: Agrostophyllinae Szlach.

Genus: *Agrostophyllum* Blume (2/100)

Tribe: Collabieae Pfitzer.

Genera: *Acanthephippium* Endl. (1/13), *Ania* Lindl. (2/11), *Calanthe* R. Br. (7/216), *Cephalantheropsis* Guillaumin (2/4), *Chrysoglossum* Blume (1/4), *Eriodes* Rolfe (1/1), *Nephelaphyllum* Blume (1/11), *Pachystoma* Blume (1/3), *Phaius* Lour. (4/45), *Spathoglottis* Blume (1/48), *Tainia* Blume (1/23).

Tribe: Podochileae Pfitzer.

Genera: *Bryobium* Lindl. (1/8), *Callostylis* Blume (2/5), *Ceratostylis* Blume (1/147), *Conchidium* Griff. (1/10), *Cryptochilus* Wall. (2/5), *Eria* Lindl. (9/237), *Mycaranthes* Blume (2/36), *Phreatia* Lindl. (1/211), *Pinalia* Lindl. (6/105), *Porpax* Lindl. (1/13), *Thelasis* Blume (2/26).

Tribe: Vandae Lindl.

Subtribe: Polystachyinae Schltr.

Genus: *Polystachya* Hook. (1/234).

Subtribe: Aeridinae Pfitzer.

Genera: *Acampe* Lindl. (2+1var./8), *Aerides* Lour. (3/25), *Arachnis* Blume (3/14), *Chiloschista* Lindl. (1/20), *Cleisocentron* Brühl (1/6), *Cleisomeria* G. Don (1/2), *Cleisostoma* Blume (9/88), *Gastrochilus* D. Don (5/56), *Holcoglossum* Schltr. (2/14), *Luisia* Gaudich. (4/39), *Papilionanthe* Schltr. (3/11), *Pelatantheria* Ridl. (1/8), *Phalaenopsis* Blume (7/70), *Pteroceras* Hassk. (1/27), *Renanthera* Lour. (1/20), *Rhynchostylis* Blume (2/3), *Sarcoglyphis* Garay. (1/12), *Schoenorchis* Reinw. (2/25), *Smitinandia* Holtum (1/3), *Taeniophyllum* Blume (1/185), *Thrixspermum* Lour. (2/161), *Uncifera* Lindl. (2/6), *Vanda* R. Br. (10/73), *Vandopsis* Pfitzer (1/4).

It may be noticed that the orchid flora of Manipur comprises of 389 taxa (including 5 varieties) belonging to 90 genera. Out of 389 taxa, there are 286 (including 3 var.) epiphytes of 49 genera, 95 (including 2 varieties) terrestrials of 38 genera, 8 mycoheterotrophs of 6 genera. It may be mentioned that some of the epiphytes like *Cymbidium tigrinum*, *Pholidota imbricate*, *P. rubra* etc. are found as lithophytic on moss covered rocks. There are 3 genera with species of mixed habits i. e. *Cymbidium* with 14 epiphytes, 6 terrestrials and 2 mycoheterotrophs; *Liparis* with 11 epiphytes and 1 terrestrial and *Eulophia* with 4 terrestrials and 1 mycotrophic species (Table).

Among larger epiphytic genera, *Dendrobium* tops the list with 67 species and 1 variety followed by *Bulbophyllum* (39), *Coelogyne* (21+1var.), *Oberonia* (14+1var.), *Eria* (9) etc. Among the terrestrials, *Peristylus* (8 species) is the largest followed by *Calanthe* (8), *Habenaria* (8), *Paphiopedilum* (5) etc. Among the 6 mycotrophic genera, *Galeola* and *Cymbidium* are with 2 species each followed by *Aphyllorchis*, *Cyrtosia*, *Eulophia* and *Yoania* with one species each. There are 4 monotypic genera viz. *Anthogonium*, *Dickasonia*, *Eriodes* and *Neogyna* reported so far from the state.

New records for the state

Out of 389 orchids reported so far from Manipur, seven species viz. *Bulbophyllum cornutum* (Blume) Rchb. f.; *Eria tomentosa* (J. Koenig) Hook. f.; *Liparis duthiei* Hook. f.; *Luisia trichorhiza* (Hook.) Blume, *Panisea apiculata* Lindl., *Pholidota rubra* Lindl. and *Pteroceras teres* (Blume) Holtt. have been reported from Manipur for the first time as new records to the state.

Threats and conservation measures

Majority of the orchid species of Manipur are facing a serious threat of extinction in the state mainly due to their natural habitat loss caused by forest clearance for 'Jhum' cultivation or 'shifting cultivation' which is still prevalent among indigenous tribes of N. E. India. It involves slash and burning of certain area of forest to grow required agriculture crop and after harvesting the

crop, that area will be abandoned for certain period of cycle. Thus, they keep on moving to different forest places for this type of cultivation and return to the first place after 5–10 years of cycle depending upon their population. Clearance of forest area for developing new townships, construction of roads and dams for generation of hydro-electricity are also playing considerable role in depletion of wild orchid populations in the state. Further, it has been noticed that ornamental orchids like *Dendrobium densiflorum*, *D. chrysanthum*, *Renanthera imschootiana*, *Vanda coerulea* etc. and the species of medicinal importance like *Dendrobium aphyllum*, *D. denudans*, *D. devonianum*, *D. nobile*, *D. fugax* etc. are collected indiscriminately by the local people from the wild on large scale for commercial purpose in the domestic as well as international market. The stems of medicinal orchids are cut into pieces and made into small bundles and smuggled illegally to China via Myanmar at the cost of Rs. 500–1000 (USD 6.99 to 13.99) per kilogram.

It is suggested to bring more amount of orchid rich-forest area of the state under protected area by the state forest department with stringent rules and regulations to preserve the flora *in situ* on one hand, and on the other to check illegal collections from the wild. Wherever, the forest area is owned by the local tribes, those people are to be made aware of the importance of the plants occur in their forest area and their sustainable utilization. Establishment of tissue-culture laboratories in the state should be encouraged by the government to propagate many rare ornamental and medicinal plants on large scale and make available to local farmers and business people which would surely reduce the pressure on wild populations.

Acknowledgements

Sincere thanks are due to Mr. H. Kipgen, President, FEEDS, Hengbung for support and facilities; and to the SEED & KIRAN Division, Department of Science and Technology, Government of India, N. Delhi for financial assistance. Second author extends sincere thanks also to the Director, Botanical Survey of India, Kolkata for encouragement and to Santanu Dey for providing relevant literature.
